

# Learning from errors – table of contents

## Introduction

Common usage

What is an error?

Being prepared to take responsibility for errors

What's in the book?

## 1 People make errors and will continue to do so

### 1.1 The human individual is both superior and fallible in processing information

### 1.2 The X and C systems: reflexes or reflecting

Learning processes of which we are unaware

Retrieval processes of which we are unaware

Paying conscious attention to and processing information

### 1.3 Classification of human errors

Skill-based slips and lapses

Errors

### 1.4 Making errors in routine actions: skill-based slips and lapses

### 1.5 Errors in tasks that follow familiar routines: rule-based mistakes

Responding to an overload of information

The role of distraction and stress

### 1.6 Errors when resolving non-familiar problems: knowledge-based mistakes

The X system constantly tries to take over work of the C system

Memory serves its own master

Rationally, the selected solution is not always the best

Not everyone is good at figures or time

Working memory cannot cope with complicated matters

### 1.7 A few suggestions

## 2 Learning from one's own errors

### 2.1 Step 1: Noticing personal errors

The error diary as a means to point out errors

The importance of early feedback

### 2.2 Step 2: Reacting to observed errors, the road to acceptance

Phases in reactions to errors

Reactions when others point out our errors

Feedback must be deserved

### 2.3 Step 3: The decision to spend time on the learning process

### 2.4 Step 4: Learning from errors

Learning tools

## **3 Dealing with others' errors**

### **3.1 Judging others' errors**

Who defines when something is an error?

We judge others more harshly than we judge ourselves

### **3.2 The decision to call a person to account**

The importance of having one's errors pointed out

The importance of pointing out their errors to others

Avoid an overdose of one-way traffic

Respect = re spectare

Pointing out one another's errors in a group

Avoid delay: the importance of interim evaluation

Suggestions

### **3.3 Meeting to discuss someone's errors**

Try to understand the reason for the error

The purpose of the meeting

Think about the opening line

Monitoring objective and mutual relation during the meeting

How to guide the other toward acceptance

## **4 Learning from errors in organisations**

### **4.1 The costs of errors in organisations**

Accidents

Failure costs

### **4.2 Obstacles to learning from errors in organisations**

### **4.3 How to motivate workers in organisations to learn from errors**

The principles of a programme of change

The steps

Illustration

The role of coach

### **4.4 Analysing errors in organisations**
